PROFESSIONAL SUMMARY

MCA student (CGPA 9.02/10) and Cloud Computing intern at Wipro with hands-on experience in AWS, Terraform (IaC), Python backend development, and Linux administration. Built reusable Terraform modules for ECS and CloudFront, automated cloud deployments, and configured Zabbix/Grafana monitoring on AWS EC2. Contributed backend web-scraping modules to an SEO/AEO/GEO analysis tool (GSAP). Strong foundation in cloud architecture, DevOps, and security fundamentals, with a growing focus on AI/ML.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, ECS, CloudFront, IAM), Terraform, Infrastructure as Code, Cloud Architecture

Programming: Python, Java, C, C++, HTML, CSS

DevOps & Monitoring: Git/GitHub, Zabbix, Grafana, CI/CD fundamentals, Linux (Ubuntu) system administration

Security Tools: Nmap, Nikto, Nuclei — vulnerability assessment & reporting

Databases: MySQL (basic)

INTERNSHIP EXPERIENCE

Wipro — Cloud Computing Intern

Jun 2026 – Jul 2026

Team B — Generative Search Alignment Framework (GSAP) Project

- Automated AWS cloud infrastructure deployment using Terraform, building reusable modules for ECS and CloudFront that cut manual provisioning steps for the team.
- Developed Python backend modules and web-scraping pipelines for an SEO/AEO/GEO Analyzer, evaluating website optimization signals.
- Installed and configured Zabbix Server and Grafana dashboards on AWS EC2 (Ubuntu) to monitor infrastructure health and performance.
- Collaborated with a cross-functional team using Git for version control and followed structured project documentation standards.
- Gained practical exposure to cloud architecture, Infrastructure as Code, and DevOps deployment best practices.

PERSONAL PROJECTS

Website Security Assessment

Nmap, Nikto, Nuclei, Linux

- Performed vulnerability assessments and port scans on web servers to identify security gaps.
- Documented findings in professional security assessment reports with remediation recommendations.

AI Voice Assistant & To-Do List App

Python

- Built a command-line voice assistant that interprets spoken commands to automate basic system tasks.
- Developed a CLI task manager with create, update, delete, and file-based persistence features.

EDUCATION

Master of Computer Applications (MCA)

CGPA: 9.05/10 (Current)

Amity University, Punjab

Bachelor of Computer Applications (BCA)

CGPA: 6.47/10

Government Degree College, Jawalaji, Himachal Pradesh

Senior Secondary (12th), HP Board

69%

Secondary (10th), HP Board

70%

CERTIFICATIONS

- Python Certification
- AWS Cloud Practitioner — Learning Path (In Progress)

CORE STRENGTHS

Team Collaboration • Problem Solving • Analytical Thinking • Communication • Adaptability • Quick Learner
